Arctic Marine Synthesis: Atlas of the Chukchi and Beaufort Seas

Herald Island

This map is based on the best available data, which varies in quality across the project area. For more information on data quality and knowledge gaps, see the introduction to the map. This map provides a visual representation of the distribution of ribbon seals (Histriophoca fasciata) in the Chukchi and Beaufort seas. The map highlights areas where ribbon seals are present, including concentration areas and specific months.

**Distribution**
- **Present (June-December)**
- **Present: Pupping, Breeding, and Molting (January-June)**
- **Concentration Area (June-December)**
- **Concentration Area (May-June)**
- **Bathymetric Contour Line (in meters)**
